AQUA GUARD
INSULATION CONTRACTING

INTRODUCTION

ABOUT THE COMPANY

AQUA GUARD
INSULATION CONTRACTING

AQUA-GUARD IS A PIONEER INSULATION CONTRACTING COMPANY WHICH OFFERS A WIDE RANGE OF SOLUTIONS WITH RELATION TO WATERPROOFING AND REPAIR, THE COMPANY IS BASED IN DUBAI AND SHARJAH.

WE ARE EXPERIENCED IN ALL THE LATEST SOLUTIONS AND METHODS OF INSULATION PRODUCTS AND WE ARE IMPLEMENTING THE LATEST TECHNOLOGIES AND EQUIPMENT UNDER THE LEADERSHIP OF HIGHLY SKILLED STAFF. WE PROVIDE OUR CUSTOMERS WITH HIGH-QUALITY SERVICES FOCUSING ON OPTIMIZATION RELIABILITY, COMMITMENT, AND EXCELLENCE.

WITH THE EXCELLENT TRACK RECORD, WE HAVE BUILT UP OVER THE YEARS AND THE HAPPY AND SATISFIED CUSTOMERS; AQUA-GUARD WATERPROOFING IS THE CORRECT BUSINESS PARTNER TO DO BUSINESS WITH. WE PROVIDE UNIQUE SOLUTIONS TO PROTECT YOUR BASEMENTS, ROOFS, WET AREAS, TUNNELS, SWIMMING POOLS, WATER TANKS, AND MANY OTHER WATER RETAINING STRUCTURES.

AQUA GUARD
INSULATION CONTRACTING

MISSION

It is critical that every aspect of our work reflects the highest level of quality, safety, craftsmanship, and professionalism. We work hard, and we work smart, while always recognizing our client's expectations. We uphold a high level of quality assurance during every project we do.

VISION

Aqua Guard strives to be the best in its class by offering a superior product with regard to the standard of workmanship and knowledge, safe working procedures, practices and policies and the installation of quality apparatus.

AQUA GUARD
INSULATION CONTRACTING

SERVICES

Aqua-Guard provides the best quality and service to their clients, the company has all the best practices, policies and procedures in place to do so. We offer the below services but not limited to:

- Bitumen membrane system.
- Combo roofing system
- Polyurea system.
- Wet area waterproofing systems.
- Swimming pool waterproofing.
- Water tank and reservoir waterproofing.
- Crystalline waterproofing system.
- Waterproofing repair works.
- Traffic coating systems.

QUALITY POLICY

- To produce a high level of quality services without compromising the specifications and the standards.
- To foster good relationships with clients by effective communications with clients and encouraging feedback.
- To continually improve the effectiveness of the Insulating materials in all the projects.
- To document and measure quality objectives and targets through internal audit and management review.
- To deliver all our services in accordance with the specifications and requirements of our clients.
- That every employee constantly aims to improve the overall quality of Company products and services.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

1 BITUMEN MEMBRANE SYSTEM

the bitumen-based waterproofing membrane is provided with an improved edge for sealing with a contiguous membrane to provide a membrane system with improved waterproofing characteristics.

Bitumen Membrane systems are ideal for both new build or refurbishment projects. Offering guaranteed quality, specifiers can select high-quality products suitable for a wide range of surfaces and thicknesses.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

2 COMBO ROOFING SYSTEM

It is a comprehensive insulation and waterproofing system that curtail the cost of energy as well as excellent waterproofing solution, thermal solution, and finishing of roof. The Combo advanced roofing system is the most economical and environment-friendly roofing system available in the market. It consists of a complete solution system for the Thermal and Moisture Protection for the Building Roofs backed by 25 years guarantee. The system meets all latest thermal insulation standards and regulations in UAE and is accepted by all major property developers, consultants and contractors. The system is also approved by various authorities like Dubai Municipality, Shariah Municipality, Shariah Water and Electricity authority and many other utilities.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

BENEFITS

- No thermal bridges
- Supply & Apply Warranty of 25 years.
- 100 % bonded system with 2 waterproofing layers
- 20% less weight compared to common systems*.
- 30 percent less time-consuming in installation.
- Cost neutral compared to common system

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

3 POLYUREA SYSTEM

Polyurea is a truly remarkable coating, lining and joint sealant technology and can be used for a wide variety of applications. Polyurea coatings and linings are commonly applied over concrete and steel for corrosion protection and abrasion resistance. They also have numerous advantages over conventional materials due to their extremely fast setting times, high elongation, extreme resistance to atmospheric attack and their durability abrasion characteristics.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

WET AREA WATERPROOFING SYSTEMS

Aqua-Guard offers a full service for any wet area under tiling which will be in direct contact and with water such as kitchen, bathroom, laundry, and others in residential or commercial buildings in either on a new building or for repairing old ones. In both cases, a waterproofing system needs to be applied under tiling (the wet area) in order to protect the concrete and prevent any water leakage. Proper waterproofing in wet areas which we offer is absolutely vital. Water leaking into the floor and wall spaces can very easily rot structural timbers and do some heartbreaking damage to your construction. Waterproofing involves painting a liquid rubber membrane or cementation membrane or polyurethane onto areas that are likely to see water, so as to create a kind of 'sealed' area. Obviously, the purpose is to help contain any water that might leak out.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

WET AREA WATERPROOFING SYSTEMS

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

5 SWIMMING POOL WATERPROOFING

Reinforced concrete structures are often used in the construction of baths and swimming pools. Since they are often in permanent contact with the water contained in the bath or pool, as well as with water in the ground, they must be waterproofed and protected from aggressive agents that could potentially compromise their durability over the years.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

6 WATER TANK AND RESERVOIRS WATERPROOFING

Water tank waterproofing coating is necessary to protect water tanks. Water A tank or an artificial pond is constantly exposed to pressing water. They need also to withstand constant battering from the elements and leaking is common after a few years. Aqua-Guard offers liquid-applied cementation waterproofing systems with long-term protection for simple, detailed, or complicated Water Tank or Artificial Pond structures.

We have the latest technology of a premium liquid cementation waterproofing system that offers easy application, full certifications, and most importantly guaranteed long lasting results for water tank lining. It can be used for new water tanks and as part of a repairing system in old water tanks.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

6 WATER TANK AND RESERVOIRS WATERPROOFING

Groove formation with:
DUROCRET-PLUS or
RAPICRET

Waterproofing with:
AQUAMAT in case of underground tanks
AQUAMAT-ELASTIC in case of tanks
above the ground

Filling, where is required, with:
DUROCRET-PLUS or
RAPICRET

Reinforced
concrete to which
PLASTIPROOF and
AQUAMAT-ADMIX

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

7 CRYSTALLINE WATERPROOFING

This modern waterproofing technology involves integral concrete waterproofing, where the concrete becomes self-sealant. Crystalline materials mixed with fresh concrete form reactive needle-like crystals, which protect the concrete against the ingress of water. The system was proved effective worldwide through many international laboratory testing and certifications. The crystalline system contributes to reducing the time of construction and in many cases, reduces cost in comparison to the traditional systems.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

8 WATERPROOFING REPAIR WORKS

Aqua Guard provides a unique waterproofing repair system that in some cases combines different methods of repair depending on the leakage condition. The repair proposal will be decided by experts in the field of repair, and will be optimized to be efficient and economical at the same time. Concrete structure leakages will mainly be repaired using the modern Crystalline Repair System, which involves cementitious materials that have similar properties to concrete, and therefore is more compatible with concrete than other waterproofing products.

APPLICATIONS

AQUA GUARD
INSULATION CONTRACTING

9 TRAFFIC COATING SYSTEMS

Traffic coating systems are widely used and mostly in car parking. This system is widely used to protect the concrete from common oils, greases, and other harmful chemicals to the concrete surface. Coatings can be slip-resistant, with the addition of aggregates, or applied with a smooth finish.

Other surfaces that require traffic system coatings are, but not limited to: Pharmaceutical and medical facilities. Chemical manufacturing plants. Aircraft hangers and maintenance areas. Food and beverage production areas. Warehouses.

The most common coatings that are used in those areas are epoxy coatings and polyurethane coatings. Aqua-Guard provides a wide range of products and applications related to traffic coatings depending on specifications and requirements. Aqua-Guard can also propose different solutions for system maintenance and restoration
